

## A STEP FORWARD IN CASHLESS READERS.

### WIFI support

Integrated WIFI reduces installation complexity. Network cables need not be attached to each machine or game, saving deployment time and cost while opening up new installation possibilities. Additionally, our **new handheld models** utilize interchangeable lithium-ion batteries.

### Customizable Screen

Want to run a promotion? Not only do the Paydia® Readers allow venues to program and reprogram purchase options, it can also integrate logos, specials, and other branded material directly onto the card reader screen.

### Backwards compatibility

Perhaps best of all, Paydia® Readers can be implemented alongside existing CORE infrastructure, and communicates with the existing M.O.R.E. accounting and reporting software.

## Improved payments. Increased return on investment.

# 4000+

CORE has now deployed **over 4000** Paydia<sup>®</sup> Readers in 2016, with several thousand slated for 2017.

---

We call it the Paydia<sup>®</sup> Reader. You'll call it **fast, flexible, and future-ready**.

Designed to work with the new Paydia<sup>®</sup> Kiosks, it comes in **four models**:

**Swiper** Used with cards with magnetic stripes or bar codes. A popular choice in arcades and amusement centers across the globe.

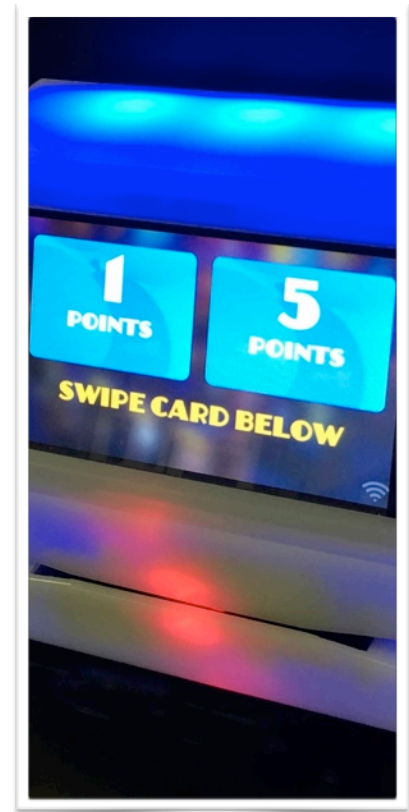

**Scanner** For wristbands, mobile phones, or cards with bar codes. A natural fit for water and theme parks.

**RFID** Used with cards, wristbands, or mobile phones with RFID chips. Offers easy payment, access control, and time play.

**Handheld** CORE's **newest addition**, the handheld is the perfect fit for scanning on the go. Current models handle barcodes or RFID scanning; future versions will be capable of credit card processing.

Call CORE today to discuss pricing and availability.
